

Depot Standards/Evaluation Work Team
April 25, 2008, Friday, 9:00 – 11:00 A.M., CPE Conference Room B

Present: Stephen Noble (UofL), Donna Eustace (KDE), Eric Weig (UK), Jeffrey Jones (FCPS), Miko Pattie (CPE)

1. Review of the Required Data elements:

The group reviewed the following elements:

- “2.3. Contribute” - Following an email exchange with SREB, Miko reported that this element, not included in SCORE schema, is not necessary if we require 2.3.1, 2.3.2, and 2.3.3. (Contributor role, entity, and date). The group concurred.
- “6. Rights” - Policies need to come from the Business Plan Team although we have identified required data elements for this area already.
- “1.8. Aggregate Level” – We will have 2 levels as defined by SCORE (Level 1 = Asset: includes information objects; Level 2 = Learning object; includes learning components)

Note: In searching, we will have “All” as default but allows selection of assets or learning objects as search criteria.

2. **Next Step** – We will test how these required data elements we defined affect “Contribute” and “Search” in The Depot.

3. **Next meeting** - May 27, Tuesday, 9:00 – 11:00 A.M.
